

MSS – MULTISENSOR SURVEILLANCE SYSTEM

Tried and tested multilateration system for military applications

The MSS (Multisensor Surveillance System) by ERA, widely deployed for air traffic control, is a mature surveillance system providing high availability, maintainability and survivability in all operational environments for military applications amongst other things.

MILITARY ATC SOLUTIONS

Enroute/Approach/Ground Surveillance

Precision Approach Solution

FEATURES:

- Mode 1, 2, 3/A, C, Mode S
- Operating temperature -40°C to $+60^{\circ}\text{C}$
- Relative humidity up to 100 %
- ASTERIX DATA format

BENEFITS:

- ✓ Tried and tested solution in all weather conditions (IP67)
- ✓ Excellent performance - proven technology providing high reliability and safety
- ✓ Easy expandability for seamless surveillance
- ✓ Modular, robust system
- ✓ High update rate
