

INTEGRATED POLICY OF ERA a.s.

ERA a.s. commits itself to create the conditions and provide the resources necessary to fulfill the policy and objectives of the integrated management system. This is to ensure the fulfillment of customers and all IMS stakeholders' requirements, and to ensure the continuous improvement of the integrated management system. To meet these commitments, ERA a.s. conducts primarily the following:

- Continuous evaluation of compliance with the legislation and other requirements,
- planning, realization and continuous evaluation of the IMS and all implementation processes' effectivity,
- risk and pollution prevention, prevention of emergencies with potential impact on the environment or safety at work.
- development, production and delivery of products that are, from the operational and maintenance point of view, safe and secure for the customer,
- conformity with occupational safety rules within the ERA, supplier and customer premises,
- realization of corrective actions and evaluation of their effectiveness,
- continuous provision of necessary qualification, expertise and motivation to ERA employees, including the protection of their health and the health of other interested parties (persons),
- key knowledge management,
- continuous increase of the environmental protection level in accordance with the latest technical knowledge and minimizing the company's environmental footprint.

The Integrated Policy of ERA a.s. has been approved on 01/10/2018.
